

## CERTIFIED PROFESSIONAL CONSTRUCTOR INFORMATIONAL SESSION

Friday, March 12, 2010

8 a.m. - 10 a.m.

Construction Training School, 6301 Knox Industrial Drive, St. Louis, MO 63139

**AGC of St. Louis has partnered with the American Institute of Constructors to offer an informational session for the Certified Professional Constructors certification process.**

Register now for the March 12, 2010 Informational Session on the Certified Professional Constructors (CPC) certification process offered at Construction Training School. Learn about the CPC Certification Process, Benefits of Certification, Certification Growth & Endorsement, Overview of the Exam, Exam Format & Question Structure, Subject Areas and Preparation and Success Rate.

### The Importance of Constructor Certification

In an effort to recognize the unique technical and managerial knowledge and skills required today, the American Institute of Constructors (AIC) Certification Commission qualifies individuals through education, experience and examination for the professional designations of Level I Associate Constructor (AC) and Level II Certified Professional Constructor (CPC).

*Construction Certification Exams are given nationwide every spring and fall.*

### Benefits to the Constructor

- Provides an internationally recognized professional qualification of construction management skills and knowledge.
- Provides an analysis of individual strengths and weaknesses in the subject areas tested.
- Enhances the Constructor image as a professional to their employer, their clients and the public.
- Provides a marketable credential that sets you apart.

### Benefits to the Employer

- Provides an independent assessment of an employee's skills and knowledge, based on a comprehensive national standard.
- Provides a recognized credentialing within your company that improves marketability to clients.
- Provides assurance that employees will continue to hone their skills, through the required Continuing Professional Development program.
